

Pythagoras

Hello, my name is Pythagoras (Pith-ag-or-us). I am a Greek philosopher and mathematician. I traveled widely in search of wisdom and truth. My followers made many discoveries in math and astronomy. I also made many important discoveries about shapes and measurements that are used today as part of geometry. I developed the Pythagorean theorem.

Performance Instructions: Dress in a Greek tunic and carry a large chart depicting the Pythagorean theorem. After speaking, hold up your picture and say, “ ‘A’ squared plus ‘B’ squared equals ‘C’ squared!”
